## Multi-Micro Zn-EDTA (14% Zn)

|                               |  |
|-------------------------------|--|
| <b>Main Characteristics:</b>  | Multi-micro EDTA Zn 14% is a stable, water-soluble and non-dusting zinc EDTA chelate   |
| <b>Application :</b>          | For foliar, side and top dressing, and for Hydroponic  |
| <b>Appearance:</b>            | White microgranules  |
| <b>pH (1% solution):</b>      | 6 - 7  |
| <b>pH Stability range:</b>    | 2 - 10   |
| <b>Solubility in water</b>    | approx. 1,000 g/l (20 °C), 1,200 g/l (80 °C)   |
| <b>Bulk density untapped:</b> | approx. 800 - 1000 kg/m <sup>3</sup>   |
| <b>Storage:</b>               | Store in original package in a dry place at ambient temperature (below 25°C).<br>It is advised to re-test after three years of storage. Exposure to sunlight may cause degradation of the product. |

### Product analysis

|                             |       |
|-----------------------------|-------|
| Zinc (Zn) content, typical* | 14.0% |
| Zinc (Zn) chelated by EDTA  | 13.3% |

Product meets requirements for an EC-fertilizer.

\* EC fertilizer label value.

**Packaging :** 1kg cardboard boxes with an inside polyethylene lining or 25kg net multiple paper valve bags with an inside polyethylene lining

**Chemical name:** Ethylenediaminetetraacetic acid zinc-disodium complex;  
EDTA-ZnNa<sub>2</sub>

**Structure:**
